Ms. Ref. No.: JEMA-D-23-01828R3

Title: From scenario to roadmap: Design and evaluation of a web-based participatory watershed planning system for optimizing multistage implementation plans of management practices under stepwise investment

Journal of Environmental Management

Dear Dr. Zhu,

I'm pleased to inform you that the above-referenced manuscript has been accepted for publication in the Journal of Environmental Management.

Thank you very much for publishing this work in the Journal of Environmental Management.

PLEASE NOTE: The journal would like to enrich online articles by visualising and providing geographical details described in Journal of Environmental Management articles. For this purpose, corresponding KML (GoogleMaps) files can be uploaded in our online submission system. Submitted KML files will be published with your online article on ScienceDirect. Elsevier will generate maps from the KML files and include them in the online article.

Your accepted manuscript will now be transferred to our production department and work will begin on creation of the proof. If we need any additional information to create the proof, we will let you know. If not, you will be contacted again in the next few days with a request to approve the proof and to complete a number of online forms that are required for publication.

We encourage authors of original research papers to share the research objects – including raw data, methods, protocols, software, hardware and other outputs – associated with their paper. More information on how our open access Research Elements journals can help you do this is available at [https://www.elsevier.com/authors/tools-and-resources/research-elements-journals?](https://www.elsevier.com/authors/tools-and-resources/research-elements-journals?dgcid=ec_em_research_elements_email)

Yours sincerely,

Toan Trinh, Ph.D
Associate Editor
Journal of Environmental Management

Comments to Authors:

Research Elements journals (<https://www.elsevier.com/authors/tools-and-resources/research-elements-journals>) are open access journals that bridge the gap between publishing and products that support Open Science by allowing authors to publish short articles on various elements of their research such as data, methods, protocols, software and hardware. These brief, peer-reviewed articles complement full research papers, ensure that researchers receive credit and recognition for the work they have done, and contribute to open science by making more of the work that goes into research shareable, discoverable, reusable, citable, comprehensible, and reproducible by other researchers.

Should you wish, you can upload your Research Element manuscript when you submit your revised manuscript using the template below. If your submission to %JOURNALFULLTITLE% is accepted, your Research Element manuscript will be transferred to the relevant journal for editorial review and publication.

If your submission to %JOURNALFULLTITLE% has already been accepted, you can choose to submit directly to the Research Element journal using the relevant template and link below. The Original Research article and the Research Element articles will be linked on ScienceDirect. Open access fees apply. See more on Research Elements journals below:
